Team ID	
Project Title	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	Develop an intelligent debt relief platform that uses AI (Google Gemini) and financial algorithms to help borrowers negotiate fair settlements, prioritize debts, and regain financial health through data-driven decision-making
Scope	The project analyzes borrower financial profiles (income, expenses, EMI burden) and loan portfolios (outstanding amount, interest rate, overdue months) using custom financial engines to calculate health scores, stress levels, and settlement recommendations.
Problem Statement	
Description	Borrowers in financial distress lack affordable tools to negotiate settlements, prioritize debts, and generate professional correspondence with lenders — leading to worsening debt cycles, legal consequences, and severe mental health impact
Proposed Solution	

Approach	Design database schema → Build FastAPI backend with financial engine → Integrate Google Gemini AI for letter generation → Develop React.js dashboard UI → Implement JWT authentication → Test and deploy locally
Key Features	AI-powered negotiation letter generation (3 tones: Professional, Hardship, Urgent) . Financial health score calculator with EMI ratio and stress level classification. Intelligent loan priority scoring based on overdue severity

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel i3 or above
Memory	RAM specifications	4 GB (Minimum), 8 GB (Rec.)
Storage	Disk space for data, models, and logs	2 GB free space
Software		
Frameworks	Python frameworks	FastAPI / React.js / SQLite
Libraries	Additional libraries	React.js + Vite
Development Environment	IDE	VS Code, Chrome Web Browser
Data		
Data	Source, size, format	SQLite (finrelief.db)
